PROFILE

Computer Engineering student (*Élève-Ingénieur d'État*) seeking a **PFA internship in DevOps, Cloud, or Platform Engineering**. Experience building **Dockerized multi-service applications**, automating **CI and DevSecOps checks** with GitHub Actions, CodeQL and Qodana, and profiling application performance. Background in Linux, FastAPI and Spring Boot.

TECHNICAL SKILLS

Containers & Systems: Docker, Linux, Bash, Cloudflare Tunnels, Blackfire (profiling), Git

CI & DevSecOps: GitHub Actions, CodeQL, Automated Builds, Regression Tests

Backend & APIs: Python/FastAPI, Java/Spring Boot, Go, REST APIs, API Gateways, Workers, Webhooks

Data & Foundations: PostgreSQL, Supabase, ChromaDB, SQL, C/C++, Data Structures, Agile/Scrum

INTERNSHIP EXPERIENCE

Backend & Full-Stack Engineering Intern — AdoptAI (Helpdesk Project) **2026**

Java, Spring Boot, React, Supabase, PostgreSQL, REST APIs

- Collaborated on deployment and maintenance of **Helpdesk**, an incident-ticket management platform using Spring Boot, React, and PostgreSQL/Supabase.
- Structured backend REST endpoints, database schemas, and service workflows supporting ticket tracking and resolution.

SELECTED ENGINEERING PROJECTS

SmartTijara — Dockerized Multi-Service AI Commerce Platform **2026 – Present**

Docker, FastAPI, API Gateway, GitHub Actions, CodeQL, Qodana, Evolution API, Gemini

- Containerized a **multi-service environment** comprising FastAPI AI services, an API gateway, and background workers handling WhatsApp/Instagram webhook integrations.
- Automated **CI and DevSecOps checks** through **GitHub Actions**, integrating **CodeQL** security scanning and **Qodana** static code analysis.
- Improved inter-service retry handling and evaluated multilingual catalog retrieval on a fixed **102-query offline benchmark**.

Custom In-Memory Database Engine **2025 – 2026**

C, CMake, GitHub Actions, Linux, Hash Tables, Binary Search Trees

- Built an in-memory storage engine with hash tables, binary search trees, binary disk persistence, and Undo/Redo recovery.
- Configured **GitHub Actions CI** and **CMake** for repeatable builds and automated regression checks.

E-Wallet Backend — Transaction & Ledger Modeling **2026 – Present**

Java, Spring Boot, JPA/Hibernate, REST APIs, SQL

- Designed account and transaction services using monetary validation, ledger modeling, and **idempotency patterns** for reliable request processing.

TURATH.ai — LLM Fine-Tuning & Vector Retrieval Pipelines **2025 – 2026**

Python, LLaMA 3.1, MLX, FastAPI, Hugging Face, ChromaDB

- Developed dataset-preparation and LoRA/DoRA fine-tuning workflows alongside two-stage RAG retrieval and re-ranking services.

EDUCATION

Engineering Degree (Ingénieur d'État), Computer Engineering — FST Errachidia **2025 – 2028**

B.Sc. in Software Engineering — FST Errachidia **2024 – 2025**

DEUST (MIP Track) — FST Errachidia **2023 – 2024**

LEADERSHIP & HACKATHONS

HR Manager & Event Organizer — Bisoft Engineering Club **2025 – 2026**

- Co-organized **GitHub Copilot Dev Days** and **Global AI AgentCamp** at FST Errachidia, coordinating operations for **400+ attendees per event**.
- **Hackathons:** RallyIA (Merzouga), IBM AI Builders Challenge, and MIATHON'03 (UMP Oujda).
